

Shimamoto Town Earthquake Hazard Map

Registering with Osaka Disaster Prevention Net

Osaka Disaster Prevention Net is a portal site (see below for homepage). Though this portal site, Osaka Prefecture and all its municipalities collaborate to provide citizens wide-ranging and comprehensive information on disaster prevention — including information on the weather, earthquakes, and lifeline infrastructure, and information on damage and evacuation when disaster occurs.

Disaster Prevention Portal Site

- This portal site provides information that can be checked at a glance, including information on weather warnings and alerts issued within Osaka Prefecture; information on earthquakes and tsunami; evacuation advisories and instructions issued by each municipality when a disaster occurs; the state of damage and countermeasures; disaster prevention (hazard) maps compiled by each municipality; and information on traffic, roads, and the state of lifeline service and operation.
- A “Shimamotocho” page is also provided on this portal site, with detailed information on the situation in the town during disasters. Please use this page if the need arises.

Disaster Prevention Information E-mail

- Information on the weather, earthquakes, and tsunamis, as well as evacuation advisories and instructions when a disaster occurs, is sent to mobile phones or e-mail addresses registered with “Osaka Disaster Prevention Net.” We recommend that you register your e-mail address.
- Please bear in mind that, while there is no charge for registering for e-mail transmission, users will be charged for e-mail receipt.
- It is also possible to send an e-mail by scanning the QR code below with a mobile phone.

How to register for disaster prevention mail...

Please send a blank e-mail to
touroku@osaka-bousai.net.

For details on how to register and other information, see the disaster prevention e-mail page on “Osaka Disaster Prevention Net.” Please note that you will need to disable any anti-spam settings such as domain-specific blocking or e-mail reception blocking before registering.

About the Government Emergency Radio System for Disaster Prevention and Relief Siren Patterns

In Shimamoto Town, a siren is used as the warning sound for emergency information such as evacuation advisories and instructions (emergency).

● Evacuation advisory and instruction (emergency) alerts

A siren will sound for 20 seconds

5-second pause

A siren will sound for 20 seconds

5-second pause

Voice broadcast

● Earthquake Early Warning (maximum Shindo (earthquake intensity) Level 5 lower or above)

Earthquake Early Warning chime

Voice broadcast

〈Content of voice broadcast〉 **Earthquake Early Warning. This is a major earthquake. This is a major earthquake.** … (Repeated 3 times.)
